**Warranty Period:** TESCO offers a limited product warranty for a period of ten years from date of purchase on all surge protection devices. In-home household electronic equipment and electro-mechanical appliances must be properly connected to the surge protection device. Claims are only covered in those cases which the respective surge protection device is destroyed or exhibits signs of damage incurred from transient voltage.

Surge protection equipment is available at the offices in Linn and Brazito. The meter-base devices will be installed by Co-op personnel. In-home surge protection strips are installed by the member. More questions about the equipment or the program can be obtained by calling the Marketing and Technical Services Department.
